

Business Reviews

Is your business struggling?

IRL believe in finding the right solution to your individual needs. We make rescuing your business our top priority.

- We help you create certainty from uncertainty
- We offer a free initial consultation
- We provide clear, practical advice to assist you in resolving your financial difficulties
- We have a wealth of experience and knowledge and believe in the overriding principles of professionalism, empathy and honesty

A meeting can help eliminate many concerns and will help you decide on the right course of action.

Undertaking a business review will help identify problem areas and will give you a clear indication of where to start.

- Our reviews are tailor made to clients' specifications and incorporate the following:
 - Business health reviews for business managers
 - Book debt reviews for asset based lenders
 - Pre and post lending reviews for funders
 - Acquisition reviews for purchasers of underperforming businesses

Our experience suggests the earlier a review is undertaken, the more positive the outcome could be for your business.
