

Operational and Financial Restructuring

Fixing your problems with restructuring

Following a review of the business, our teams are often instructed by management to assist them in the reconstruction of the business.

We can assist in the following areas:

- Working capital management
- Business fundraising
- Creditor pressure management
- Closure or sale of parts of the business
- Implementation and monitoring of cost cutting programs
- Negotiating rescheduling of debt

Our restructuring teams will work with management to implement the rescue plan by providing ongoing support and solutions.

Our teams are able to advise business managers on funding solutions when seeking finance for an under-performing business.

We can assist in raising finance in these areas:

- Bank funding
- Private equity – ‘angel funding’
- Property funding
- Asset funding
 - tangible assets
 - stock
- Invoice discounting and factoring

In many instances we are able to assist the business in avoiding formal insolvency procedures thus securing it's future.
